Panaz®

Designed in England, inspired by the World

From left to right: Simon Attard, Rollie Attard and Tony Attard

INTRODUCTION

Welcome to the latest Panaz hospitality catalogue.

For 33 years Panaz has been designing and manufacturing exclusive contract fabrics for many of the world's leading and iconic hospitality interiors. Our designs are used in hotel guest rooms, hotel public spaces, restaurants, cruise ship interiors, nightclubs, bars and indeed anywhere where style and function are a prerequisite. Now, as one of Europe's largest manufacturers of contract fabrics, Panaz is the supplier of choice for the global professional specifier.

By choosing Panaz for your clients you are making your selection based on quality, durability and conformity to international flame retardant standards, design and colour, availability and cost effectiveness.

Our culture and unceasing commitment to product excellence and innovation ensures a continuous flow of new ideas, fabric constructions and technical developments, thus asserting Panaz as a forerunner in the creation of luxury contract flame retardant furnishings.

At Panaz, we have an obsession with design. We are inspired by film, fashion, architecture, furniture and art. We are influenced by science, technology and innovation. Our style allows us the opportunity to merge this magic into a voyage of invention and discovery. This journey of creativity is further strengthened by our relationships with international collaborators and associates.

Since winning our first award 30 years ago, Panaz has been a benchmark in our industry, producing award winning fabrics and collections, everything we do is focused on our customer's requirements. Our total commitment to our customers is also demonstrated in our fully automated warehouse facility, which stocks over 5000 items available for world wide next day delivery.

Welcome to our catalogue of endless possibilities.

Tony Attard CEO

"Quality is never an accident.
It is always the result of
intelligent effort." John Ruskin

WHEN A HUMAN BEING IS CREATIVE, ANYTHING IS POSSIBLE

At Panaz, we constantly monitor the development of progressive technologies. We are inspired by the opportunities offered to us by new machinery and materials in our search to add value and increase service levels to our clients.

We purchased our first digital printing machine over 10 years ago, but the machinery was limited to small prototype runs and did not have the reliability for full scale production. Since then, recent developments in digital manufacturing have opened up a whole new world of possibilities.

Our continued investment in high output digital production machinery gives us the opportunity for bespoke manufacturing, where the limits are only your imagination. By using the latest water based inks, the quality and handle give us the look, feel and performance expected from Panaz.

Our experienced Business Development Managers are available at any time to discuss your bespoke requirements.

Corporate Social Responsibility

Panaz firmly believes that building our business and our corporate social responsibility go hand in hand. As a global operation, we are conscious of our corporate footprint both here and abroad and we are committed to the impact our activities can have environmentally, philanthropically and ethically.

As a global manufacturer of high quality contract textiles, Panaz is committed to reducing our impact on the environment. We monitor and restrict our power consumption, water usage and the creation of waste, with formal environmental policies and the application of the latest technologies applied across all aspects of our operations.

Our environmental policy is specifically tailored to our manufacturing and distribution business and is our company's written commitment to both the people within our organisation and to our customers and suppliers. It confirms our company's commitment to continuous improvement in managing resources and environmental issues, including the proper management and monitoring of waste, the reduction of pollution and emissions, compliance with environmental legislation and environmental codes of practice, training for staff, and the monitoring of environmental performance.

Currently we comply with:

- Waste (England and Wales) Regulations 2011
- The Hazardous Waste (England and Wales) Regulations 2005
- Environmental Protection (Duty of Care) Regulations 1991
- The Environment Act 1990
- The Control of Pollution (Amendment) Act 1989

Since Panaz was established in 1985, our whole philosophy on the environment and the impact we have on it has been at the forefront of our thinking. It is one of the main drivers when considering corporate policy as a whole. Our first resolution was to use dry printing methods for production, which was revolutionary at the time. Dispensing with the need for water during our print process was new thinking and has since become generally accepted across our industry.

• By using inherently FR yarns no chemical treatments are required to achieve international FR standards. Those using Trevira CS also qualify for Oeko Tex certification.

• Panaz printed fabrics are produced using sublistatic printing techniques which involve no chemical processes, water or effluents. No solvents are used during the printing process and any possible contaminates, for example waste oil during routine maintenance, are collected from us by B & M Salvage Fuels, a company registered for the safe disposal of such products.

• All packaging materials, cardboard cores and transfer paper used in our manufacturing processes are obtained from using pulp from sustainable forests. Cores are re-used repeatedly, and all other paper products are recycled through waste management systems. All printing inks are water soluble.

In addition we work with our clients to collect and re-use packaging materials.

• Panaz has recently had a full survey by the Carbon Trust. The survey identified seven projects targeting a reduction in energy use and therefore CO_2 emissions of 15%. In conjunction with the Carbon Trust, we are actively exploring more ways that we can reduce our environmental impact and implement a sustainability programme that will lead us into the next generation of safe sustainable policies.

A Philanthropic Ethos

• The Sewing Rooms
"The Sewing Rooms" is a social enterprise dedicated to improving the health and wellbeing of the communities they work with. This is delivered through bespoke training and a manufacturing department that makes soft furnishings, accessories and bespoke upholstery for sale. Panaz are delighted to provide The Sewing Rooms with our end of roll stock for use in their projects, and recently supplied the charity with new sewing machines and equipment.

• The Festival of Making
Panaz were honoured to play our part in Lancashire's first ever Festival of Making during September 2017, a celebration of Britain's unrivalled making heritage, and in-particular the festival's headline event - 'Art in Manufacturing'. This unprecedented collaboration project saw select Lancashire manufacturers, including Panaz, open their doors to artists with the task of producing unique works that explore the unheralded skills, processes and history of our region's factories and rich textile heritage.

• The Manchester International Festival
With strong links to culture and the arts, Panaz has been a staunch supporter of Manchester International Festival, the world's first festival of original, new work and special events. We are proud to not only be a corporate sponsor of the event but also to provide fabric for Manchester University design students to create unique and beautiful installations for use throughout the festival.

• The Furniture Makers' Charity
Having previously held the positions of National President and regional Chairperson, our CEO, Tony Attard OBE DL and Head of HR, Karen Fairhurst respectively, now support the industry charity as Second Assistant as an Officer of the Court and Karen as a Fellow to the charity. In these roles, Tony and Karen continue to act as ambassadors for the charity and to raise valuable funds for the industry.

• Clitheroe Wolves
Now in their 25th Year, Clitheroe Wolves Football Club has grown from strength to strength. They rely entirely on support from local businesses, and Panaz are delighted to provide sponsorship to this local club.

An Ethical Employer

As a global company, we seek to promote sustainable development in everything we do and we ensure that our suppliers both here and internationally adopt the same principles in line with our own sustainability policy.

Images from left to right : The Sewing Rooms creations; Simon Grennan working with Panaz staff for 'Art in Manufacturing'; Panaz fabrics featured at The Manchester International Festival; Tony Attard for The Furniture Makers' Charity; and Clitheroe Wolves.

The Panaz name has always been synonymous with impeccable quality and uncompromised product performance. Our passion for the skills associated with the production of textiles ensures that we are critically aware of the technical requirements we need to meet to deliver exceptional craftsmanship.

Design inspiration is taken from all corners of the world but before our in-house design team can embark on any design journey, the technical performance of each fabric is established.

As a specialist hospitality fabric producer, a comprehensive performance criterion is created for each design and quality dependent upon the proposed end use, as seen in the chart below. Once established, yarns, colours, fabric weight, chemistry and technical achievement are rigorously adhered to, using state of the art techniques.
Our product development and quality team visit our suppliers regularly to make sure that their processes and production methods meet all our standards.

After manufacture, the fabrics are finished to meet their final specification with washing, heat-setting and, if required, technical finishes are applied, such as stain resistance. At all times, the required final 'feel and handle' of the fabric are maintained.

Every metre is meticulously checked more than three times before finally being dispatched to our customers around the world.
