30% of Mercura production is dedicated to customize projects.

We incorporate your need and our experience to deliver unsurpassed quality and durability.

Discover some of our latest projects:

**Need:**

more efficiency in the recycling process without compromising the esthetics

**Solution:**

5 plastic bag holders for efficient recycling. Doors and lid to hide garbage

### **Need:**

more efficiency in the recycling process and organisation of equipment without compromising the esthaetics

### **Solution:**

Cart completely closed, 5 drawers for amenities and one big drawer to hold 2 bins

### **Need:**

Creation of new procedures to avoid contaminations

### **Solution:**

2 separate carts completely closed.  
one for dirty linen/garbage/cleaning  
equipment

One for clean linen and amenities

### Need:

Hide everything inside the main cart  
+ Transport dirty linen cart on top of  
the main housekeeping cart when  
it's empty

### Solution:

Hook behind to transport folding  
linen cart

### Need:

maximize performances in the cleaning process and avoid expensive loss of time

### Solution:

3 carts: The work flow is studied to be able to use the carts individually or coupled thanks to the hooking systems

# IN-ROOM HOUSEKEEPING CARTS

- ✓ housekeepers can easily maneuver their supplies out of hallways and into guest rooms without comprising efficiency
- ✓ Just the right size to have all supplies and amenities within arm's reach of the area being cleaned (no wasting time trekking back and forth)
- ✓ Made of aluminum: greatly reducing the overall weight of the housekeeping cart + solid and easy to sanitize
- ✓ Lowering workers comp claims is an ROI that pays dividends far into the future
- ✓ reduce worker fatigue and worker's compensation claims

## GOAL:

The hotel needed new processes to maintain the highest cleaning standards in face of the pandemic.

## SOLUTION:

3 trolley system. All 3 carts connect via hooks and can be connected and pushed together when needed.

CART N° 1

transport of dirty linen and garbage:  
completely closed to avoid contaminations

CART N° 2

Transport of clean linen and amenities

CART N° 3

transport of cleaning equipment and "infected" room items. Once the guest checks out, the housekeeper puts inside the basket all "infected" items that cannot be thrown away such as menus, brochures, and hairdryers. The basket with the "infected" content will be then removed and replaced with a basket with sanitized items.

New color: Black anodized aluminum (not painted)

### Need:

Create a cart where the local artist could paint on it

### Solution:

Luggage cart with wood panels – the cart can be tagged and customized by the designer/artist or by the guests

It can be repainted to change look according to the occasion
