Our Customer Promise

When Paula Douer and Harry Tchira created Crescent Garden in 1999, they were skilled in manufacturing and design, and while enthusiastic about gardening they weren't yet experts. They set about listening, learning, and discovering from industry friends and colleagues what's needed for gardens and gardeners to thrive. 25 years later, the Crescent Garden Company is a popular and progressive home and garden provider, bringing together a premier container gardening brand, a pioneer in self-watering and sustainable solutions. The company culture is powered by people who are professional, passionate and always in their customers' corner.

Lead brand Crescent Garden, trusted by contractors, designers, plant experts, independent garden centers and nurseries, offers containers and accessories distinguished by refined design and breakthrough innovation that lasts and lasts, for successful, inspired gardening.

Their pioneering TruDrop™ system engineers self-watering planters to go up to weeks without watering, for phenomenal results and more confident gardeners. TruDrop dramatically transforms the way people care for plants.

Crescent Too, available across garden centers, popular retailers and online, brings attractive and useful containers and supplies that make gardening easier and more rewarding to more people, at excellent value.

Crescent Garden believes that planters should work for you, not the other way around, and directs their R&D on design and innovation that pushes the envelope, legendary reliability and durability in whatever season, and understanding what works best for healthy plants and the people who love them.

With a vision to make gardening more accessible and relevant to everyone, while going beyond industry standards for what's possible, the Crescent Garden Company dedicates everything toward a simple customer promise:

we help you grow

CRESCENT *garden*

Crescent Garden planters are defined by their refined design and breakthrough innovation that lasts and lasts for successful, inspired gardening.

From glossy metals, to rich
leathers these planters.

Crescent**TOO**

Attractive and useful
planters that make gardening
easier and more rewarding
for more people

Versatile self-watering with
TruDrop Flex

Enhance any residential or
commercial property.

Everyday planters
well-made

At Crescent Garden, sustainability begins with a distinct sensibility — a circular, continuous approach for positive impact wherever we can make a difference. We look at everything in harmony, inside and out, over time.

Surrounding our products are processes and policies, for a holistic approach to lessening our own environmental footprint, which in turn can result in more climate-positive outcomes in our retailer and customer communities.

Whether it's internal ways of working, how we source, make and distribute, or how gardeners use, dispose, and recycle, we want to help everyone grow, more sustainably.

Centered on the lifecycle of our products

Our R&D lifecycle is circular from the outset: Materials / Manufacturing / Distribution / Customer Experience. Thoughtful resource use and innovations in product development, energy-efficient manufacturing, reducing our shipping carbon footprint, ecological emphasis in product use and advice, and responsible disposal and reuse. Good goes around.

Promoting green spaces in our facilities.

Our manufacturing facility in Colombia sits on a campus that invested heavily in adding trees and green spaces where there weren't any before, for improved carbon offset. Our new corporate headquarters that will open in 2025, is designed as a multi-use space with large green areas both indoors and outdoors that are designed as flexible work spaces both for us and open to the public.

Creating a paperless company

From our beginnings over 25 years ago, we envisioned a nature-centric company that would use technology to remain paperless. We have no file cabinets, and our team members work together on multiple, energy-efficient screens, integrating electronically with our vendors and customers. We continue to pioneer ways to work more resource-efficiently throughout.

DESIGN & PRODUCTION

- Responsible manufacturing is fundamental: efficient, safe, environment-conscious, and community-minded.
- Total Recycling approach reusing scrap and excess in our own facilities.
- Use of local, renewable suppliers when available.

100% MATERIALS

- Designed for continuous use – never ending the lifecycle.
- 100% recyclable across multiple lifecycles.
- Easily separated mixed materials.
- **Introducing** upcycled and bio-based innovations: **Circular Positive™** product ranges.

DISTRIBUTION

- Lightweight and unbreakable products that use less energy and packaging in transport.
- Ordering, production and shipping procedures to minimize resource consumption.

CONSUMER EXPERIENCE

- Using less water and fertilizer, a vital element in sustainable gardens.
- TruDrop self-watering planters collect rain and irrigation water for up to 50% savings.
- High durability. Most products supported by a 10 Yr Warranty.

Identify the Logos

10 Year Warranty

Our 10 Year Warranty against fading, or cracking on our rotationally molded products gives confidence to consumers when purchasing our products.

Circular Positive TM, **NEW!**

A circular, continuous approach for plant and planet: these planters are manufactured with an upcycled material made from landfill waste diverting harmful emissions for a more positive environmental impact.

TruDrop System

Our patented TruDrop self-watering delivers phenomenal results with little effort. See more details on page 18

Water Gardening

Easy to install and maintain, these containers are ideal to tap into the water gardening market. With a broad selection of shapes, depths and sizes, these containers can accommodate a variety of water gardening plants and fish. Some of our planters are also supplied with specialty plugs to use with fountain pumps.

No Drainage Holes

Healthy plants start with proper drainage. We design most of our planters with elevated pot feet and drainage holes that are adequately sized for each planter. However, there are times when consumers just need a cache pot or drainage can be an issue. In these case you will find the No Drainage Holes icon on the page.

Double Wall

Double Walled construction provides many benefits including superior structural integrity, enhanced appearance and insulating properties for better thermal protection of plant roots.

Can be Personalized

Some of our planters can be branded with a logo, house number or family name. See page 14.

Custom Color

Provide us with a Pantone color choice of your own and we can have the product manufactured specifically for your design needs.

HF Water Reservoir

This traditional self-watering system includes lava rocks to place at the bottom of the planter to create a small reservoir to extend between watering.

CRESCENT
garden

HF

HF System

This great selection of planters comes with the HF self-watering system for easy maintenance and healthier plants.

Diversity of Materials

From stainless steel, to wood and leather, these planters offer rich texture to match any environment both indoors and outdoors.

Custom Color

There is an endless possibility of color options as these planters can be customized for individual projects. Just contact our customer service for more information.

5 Year Limited Warranty

The materials and manufacturing of these products represent quality craftsmanship. The metals are forged from thick rolled materials making sure they are resistant. The wood veneers are selected for their uniformity in color.

Understanding Crescent Garden HF

Self-Watering System

Built in with a **reservoir**, wicks and volcanic rock, the HF planters have a traditional self-watering system that functions well indoors.

Variety of Finishes

The richness of **leather**, the industrial feel of perforated **metals**, or the refined **gloss** allows you to match style to your curated design.

5 Year Limited Warranty

Fabricated with quality products, these planters are made to withstand commercial traffic.

Custom Color Choice

Thinking ahead to your next project. These planters can be customized in any pantone color your design requires.

High Gloss:

As shiny as your patent leather shoes, these planters will add stature to any interior environment.

Elegant and Minimalist:
These planters bring a classic touch
to any commercial setting.

Bring plants to Eye Level:
With our tall Ferrum planters you can make
sure your plants are the focal point.

Natural Ash Wood:

Our new Fuse planters blend the soft feel of wood with metal finishes to give your plants the luxury statement they deserve.

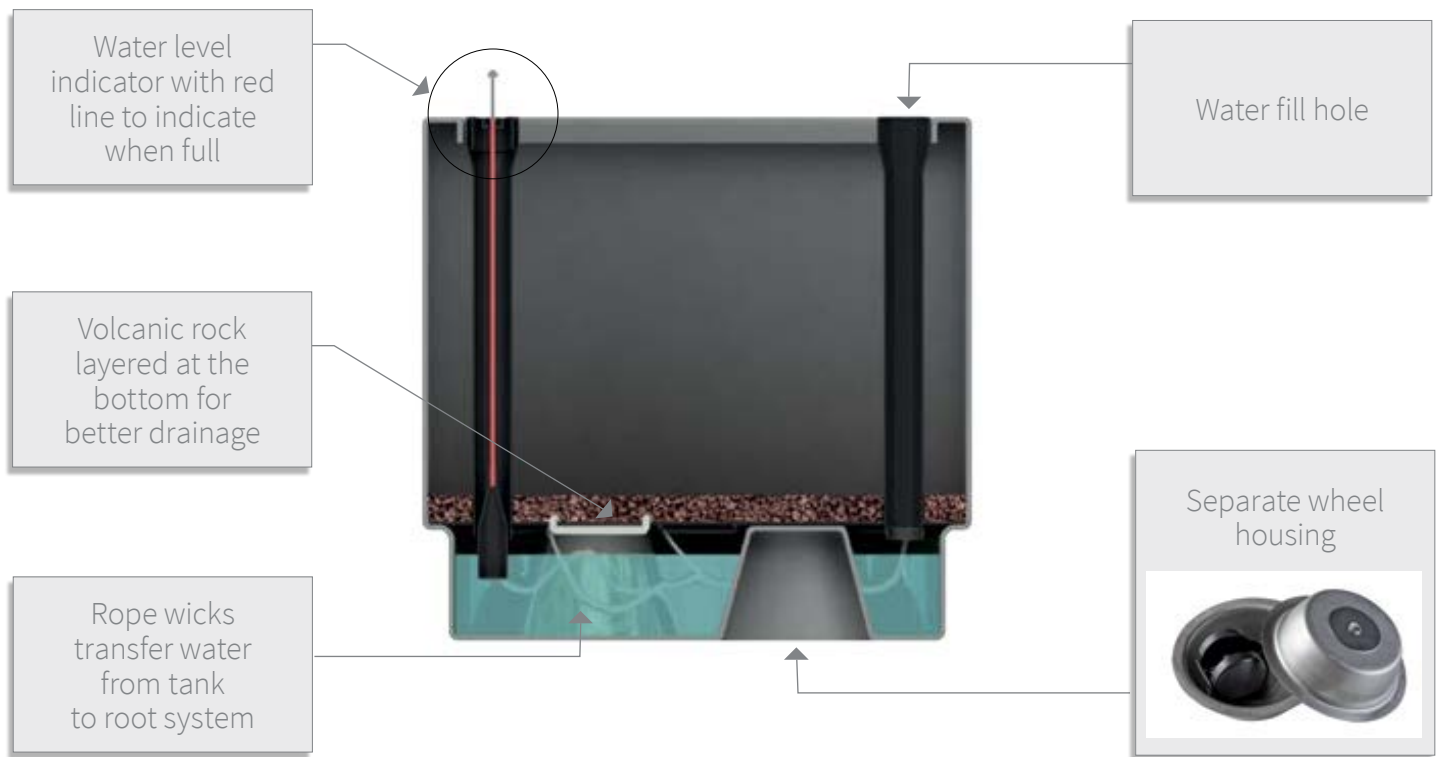

HF System

The HF patented self-watering system was first developed in Europe. These planters are manufactured with premium quality materials and ideal for both residential and commercial properties.

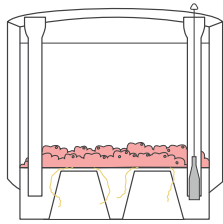

The self-watering system was designed for minimum watering. For indoor applications tank only needs to be filled 4 times a year and surface water introduced every 4 to 5 weeks. Watering will obviously vary on plant variety and air temperatures.

This system works to maintain plants healthier by increasing the circulation of oxygen to both water and roots.

- Patented System
- Easy to Maintain
- Uses less water
- Certified by the Spanish Department of Plant Physiology
- Certified by the Spanish Society of Horticulture

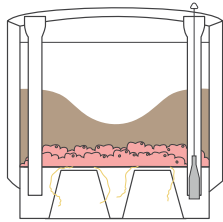

1

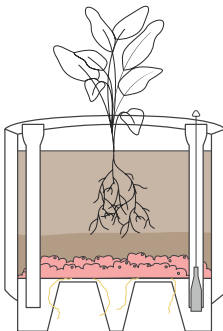

Each planter includes a bag of hydro rocks which should be layered at the bottom before planting. These rocks are porous and will absorb water, maintaining moisture near the plant's root system.

2

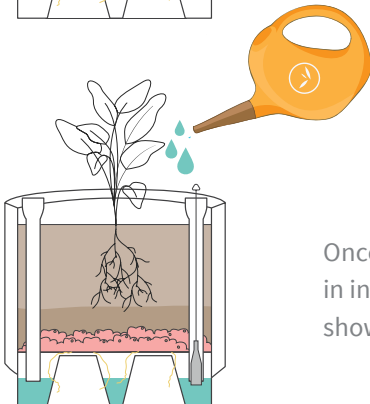

Rocks should be covered with a potting mix selected to complement your plant choice.

3

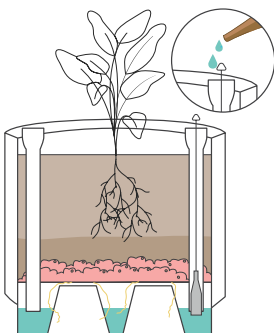

Plant should then be potted making sure to delicately separate roots.

4

Once planted, container should be watered slowly and in intervals, from the top until the water level indicator shows red for full.

5

Maintenance is easy. Fill the tank only 4 times a year and surface water every 4 or 5 weeks.

If using outdoors where planters will receive rain water please consult with us before hand to instruct on how to add an overflow drain.

Shadow Ref: 95

Can be Personalized

Make your next project unique by customizing the planters.

- Brand with hotel, city, healthcare facility or park name to delineate campuses and create greater awareness.
- Use for residential properties to identify street or house numbers.
- Create a custom family crest or display a family name to give an entrance a special touch.

Available Styles for Personalization

Pinch Planter

Rim Planter

Let's get started:

Image Requirements:

Vectorized graphic should be provided in any of the following file types: .ai, .eps, .dxf or .pdf. If providing pdf it should be created from a vectorized graphic.

Timeline for Customized Project:

Once images are received, we would provide artwork for approval within 4-5 working days. We would require signature approval on artwork. Once this is returned to us production lead time for Quick Ship items, can be between 4-5 weeks.

Minimums:

Contact us at customerservice@crescentgarden.com, for details on minimums and pricing for customized projects.

 TruDropONE

Weeks without Watering

With our TruDrop self-watering, containers can go without watering for 2-6 weeks depending on plant selection and climate.

Easy

With no rocks or wicks, this single-body planter just needs potting soil and plant making it easy even for first time gardeners.

Safe, Efficient

With 50% less water usage and more efficient use of fertilizers that remain in the water cavity, these planters are environmentally friendly.

Dramatically Successful

In our planters with TruDrop the plants determine how much water they need instead of the consumer which renders phenomenal results.

Water Level Indicator

Easy to read.

Easy To Fill Hole

Includes cap to avoid water contamination.

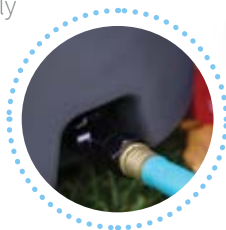

Double Wall Construction*

Large water reservoir allows plants to go longer without watering.

Mess Free Drain System

Optional quick connect coupling in larger planters facilitates draining planter without spillage.

Can connect directly to hose or pump.

Overfill Drain

When using outdoors, planter is designed to drain excess rain water.

Sealed Bottom

Plug included with planter for indoor use.

Capillary Action

Watering via roots creates healthy plants.

*Outdoor trials using a 20" (50,8 cm) planter have shown that plants **can go for up to 6 weeks without refilling.**

We never expected TruDropOne to change the way people garden but now we hear it from our clients.

“

“I returned home from **two weeks’ vacation...** and was very happy to see that my TruDrop planter did its job while I was away.”

Jed Laufferty, West Chester, Pennsylvania, U.S.A

“

“I think these are the **best** things since sliced bread lol.”

Jed Susan, Ontario, Canada

“

“They work great for me, as we live at a **lake home** with 6 outdoor pots and we are gone from our home several times a month for anywhere from a couple days to a week. With your pots, my flowers now make it through the summer without dying from lack of water.”

Debbie, Minnesota, U.S.A

“

“TruDrop’s claims that watering is only needed every two to six weeks sounded a little far-fetched, but... (It) works better than I ever imagined.”

Heather Rhoades, **Gardening Know How**

“

I got 26 days out of it... I **saved** that much **time** watering!

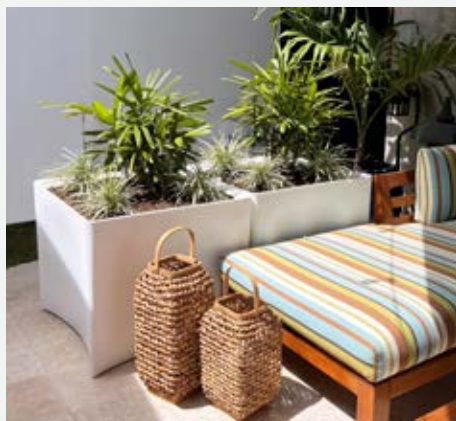

Laura LeBoutillier, **Garden Answer**, Oregon, U.S.A

“

“The pottery is **gorgeous** by the way! We have one very happy customer - can't wait to order more!”

Erin, **Landscape Solutions Company**, Tennessee, U.S.A

“

"We are a Boutique Resort in beautiful St. Croix, US Virgin Islands. For years we have searched for planters which could withstand our sun and sea elements and still have a classy and elegant presence. The planters are very easy to set up, plant and maintain. The guests continually compliment the elegance and beauty. We can not say enough about the quality of product and customer service."

Sand Castle on the Beach Hotel, Virgin Islands, U.S.A.

“

"Where we were once watering every day, we are now able to simply “top off” each planter once a week. The savings in man power have been exponential."

Mark Russel (Director of Horticulture),
SeaWorld Parks and Entertainment
Orlando, U.S.A.

“

"They have sixteen Pinch in Lawrence. I wouldn't use anything else now for city planters it saves me a lot of watering time! I have 34 estate planters in the city next to Lawrence, Haverhill. I have to water those every third day. Not with the Pinch."

Steve Nunan - Massachussetts
Nunan's Florist and Greenhouse, U.S.A.

Crescent Garden: Design Ideas

Edibles in Small Spaces:
Our Nest planters are ideal to grow edibles even in spaces with no garden.

Step it up:
With the 14" width Mod planters it is easy to bring green to narrow spaces.

Midnight Blue:

A great replacement for black, Midnight will add elegance to any space.

Crescent Garden: Design Ideas

Commercial Applications:

With TruDrop a commercial space can be retrofitted with new planters without the investment of costly sub-irrigation installations.

RESTAURANT & BAR

Narrow and Tall:
Instead of traditional urns these curved Cup planters make elegant entryways.

Supersize:

When you have a door that is over 7 feet tall make sure you use a planter proportionate like the Rim 30".

Better Economics:

TruDrop self-watering allows properties to maintain planters at a fraction of the regular cost giving them flexibility to add green in more places.

TruDrop One - Easy Drain System

			
	description		product ref.#
A	Coupler for use with any easy drain plug		AZ600588
B	Easy Drain barbed pull drain plug		BT002P193
C	Easy Drain Screw Plug for Legacy Planters		AZ607588

Make sure to order mess-free drain couplings if you will be emptying water cavity on a delicate surface.

How easy drain works

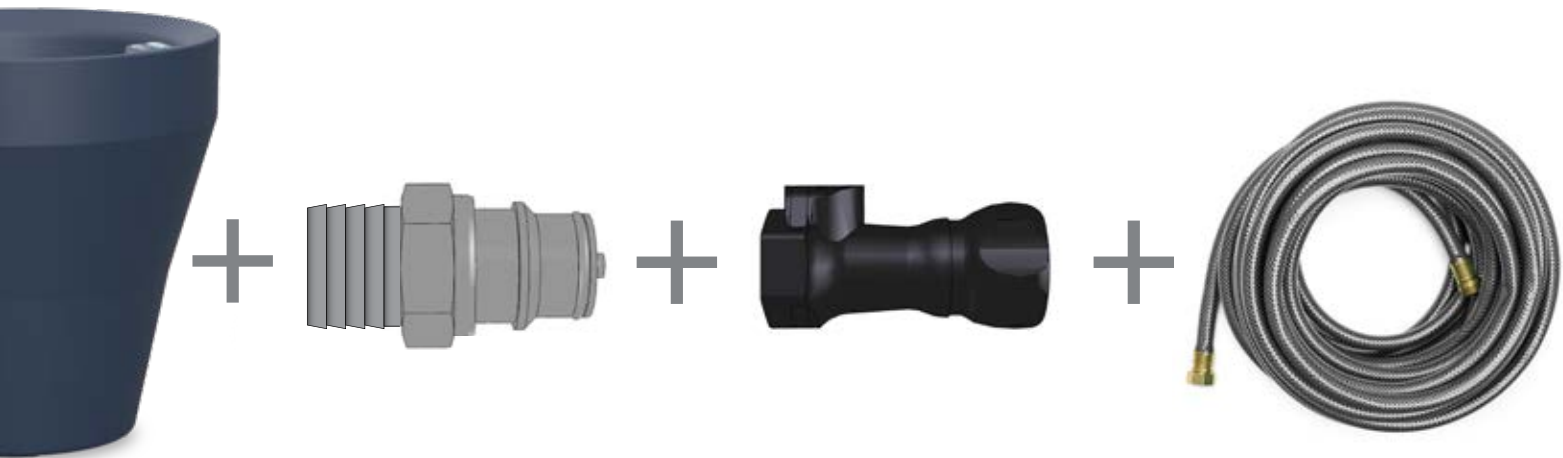

B or C

Replace the standard cap on the mouse hole opening at the bottom of the planter with the Easy Drain Screw cap or barbed pull drain cap depending on the planter selected.

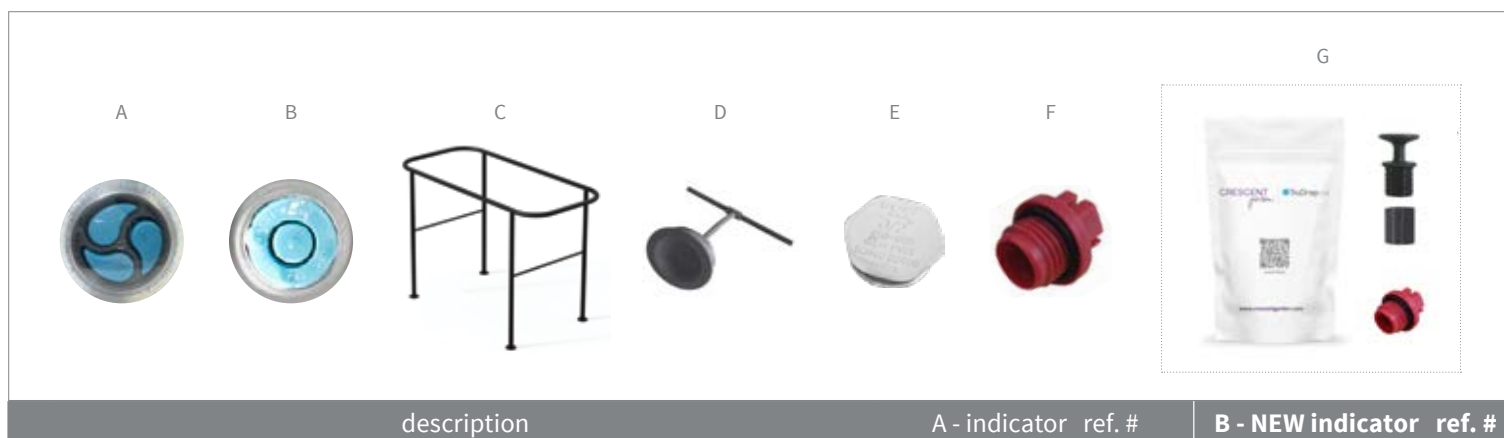

A

When you are ready to drain the planter just use the coupler to connect to a standard garden hose. Hose can then be directed to a bucket or a green area away from decks or delicate floors.

10 YEAR WARRANTY PLANTERS

Longevity

Crescent Garden rotationally molded products provide a great value to consumers given their 10 year limited warranty.

Well Designed

Every planter is detailed to deliver durability, better gardening solutions, and versatility in color and style.

Protecting Surfaces

We offer a variety of universal saucers, caddies and other solutions to protect surfaces indoors or outdoors.

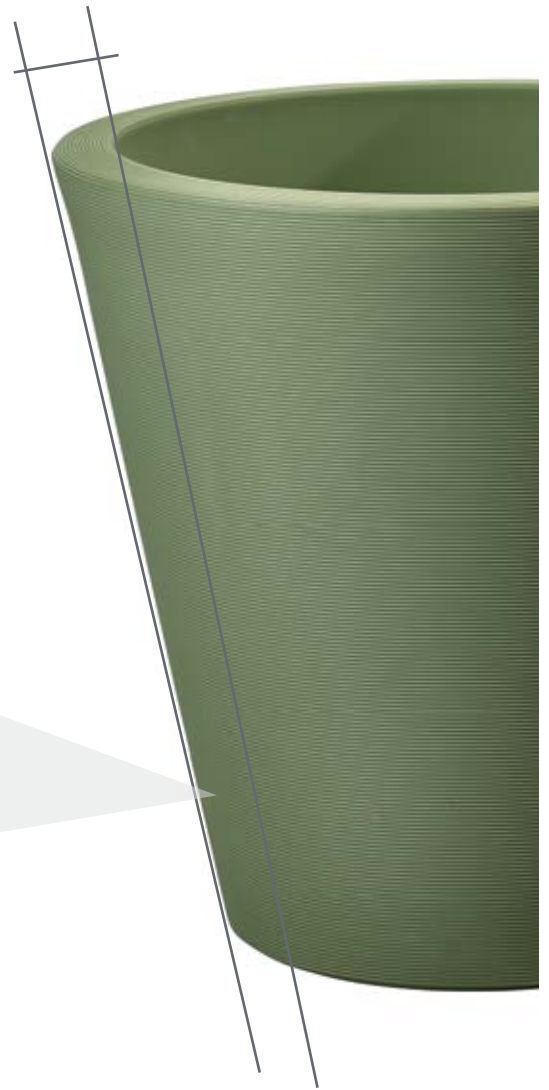

100% Recyclable

All our products are manufactured with polymer type ♻️ and can be recycled.

What makes our Planters Unique

Double Wall

To protect roots from extreme temperatures, select our double wall planters that have a pocket of air between roots and the external wall.

Lightweight

Our planters will make install a worry free process. We will make sure everything arrives to site intact and you won't need a large crew to get started.

10 Year Warranty

Our 10 Year Warranty against fading, or cracking will guarantee that you won't have complaints down the road.

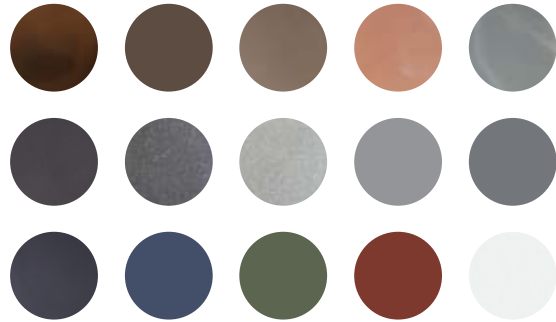

Drainage

Healthy plants start with proper drainage. We design ours with elevated pot feet and drainage holes that are adequately sized for each planter.

Variety

Every style is available in stock in a curated selection of finishes, offering designers variety.

Bowls

Bowls have so many uses in a garden setting we wanted to make sure to provide you with a solution that works for all of those; our plugs allow you to easily change a bowl from a succulent garden, to a water garden or convert it into a bubbling fountain.

Use regular plug
for water gardens.

Use plug with hole
for fountains.

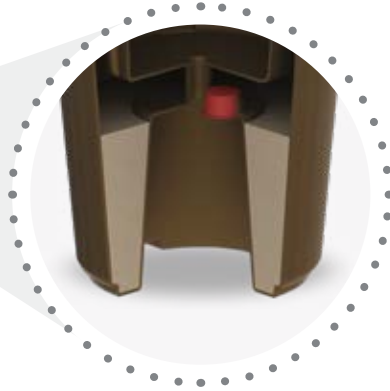

Use with no plug
for planting.

Gravity Cavity

Tall planters can be challenging in windy areas, so we designed ours with an internal cavity that can be filled with sand to weigh them down.

Attainable Design

Many of our planters are designed with a single wall for a value oriented option that still has a 10 Yr Warranty.

Young and Hip:
This step planter targets newbies who are looking for design.

Cityscapes:
Lightweight planters are ideal for rooftops and balconies where weight can be a concern.

Entryway Solutions:
Our Leyla urn is perfect for those looking for a classic style at their doorstep.

Simplicity:
Adding green in narrow spaces is easily achieved with an oval shaped planter.

Crescent**TOO**

EVERYDAY PLANTERS

Lightweight and Durable

Just like our traditional Crescent Garden planters these new products represent great quality in their category.

Great Merchandising Ideas

Bright colors and fun styles makes it easy to create attractive in store displays.

Modern Design

Our selection of sleek designs brings a new look to everyday garden products.

Smaller Sizes

Crescent Too planters start at 5" in diameter.

Great for Interiors and Exteriors

These planters are all available in stock with no holes making them ideal for use as cache-pots for smaller plants.

2 Year Limited Warranty

Our Crescent Too planters are durable in construction and many have a 2 year limited warranty.

MOBILITY AND DRAINAGE SOLUTIONS

Successful Gardening

We know drainage is essential to healthy plants, but protecting surfaces is also important so we offer a variety of solutions to make it happen.

Innovative Solutions

Maintaining proper drainage is indispensable for the survival of containerized plants. Our accessories present a variety of innovative solutions.

Movable Planters

Once potted large planters can be heavy. Add mobility to some of our planters with our casters, to clean and transform spaces easily.

Pebble Plant Caddies

These planters can move:
Hidden casters make it easy to clean or move
your plants as the seasons change.

Pebble Plant Caddies
